

INDEPENDENT STUDY APPLICATION

INDEPENDENT STUDY

The philosophy of a student enrolling in an Independent Study Course is to provide advanced study in an area beyond that is available in the regular curriculum or to provide instruction in an area in which a student cannot be enrolled during the regular school day. The student is assigned to a certified instructor for a class period and that instructor is responsible for that student during that period.

Enrollment in an Independent Study course must be approved by the student, instructor, parents, counselor, and principal. The instructor will be expected to provide instruction and expectations comparable to a regular curricular class and will be submitting lesson plans as per the requirement for regular curricular classes. No additional compensation is available.
